

## How We Do It Differently

Explore the South Reach Networks' Difference

# SOUTH REACH NETWORKS

## South Reach Networks

Your CONNECTION to the world

### Our Solutions

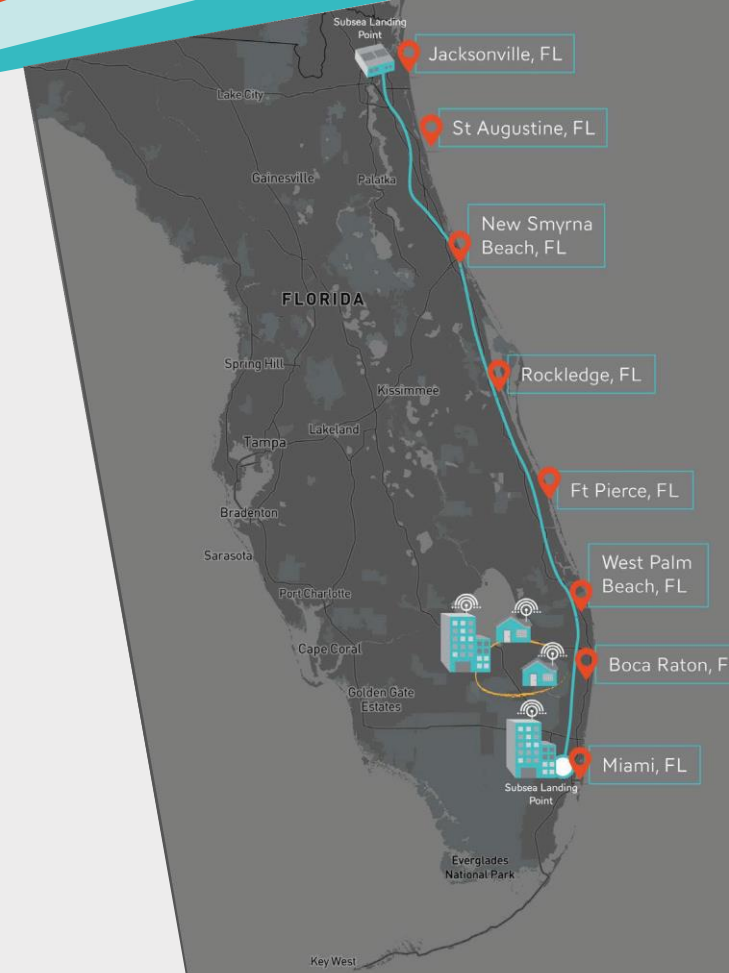

The South Reach Networks team is highly experienced in the construction, implementation and management of network solutions.

### How Can We Best Serve You?

We can identify the most optimal solutions for your business

- ↑ SRN will do a free telecom & network audit on your current carrier solutions.
- ↑ What does your company do?
- ↑ How many locations does your company have?
- ↑ Do you have space in colocation facilities?
- ↑ What is your current network topology?
- ↑ What is your current average bandwidth?
- ↑ Do you have network / access diversity?
- ↑ Who are your current providers and what are your contract obligations?
- ↑ What are your current network issues / desires?
- ↑ Would you like to increase bandwidth and lower costs?
- ↑ Do you have a scalable network today?

- **Florida East Coast Fiber Network with Global Reach**
- **Over 370 miles of 100% underground fiber fully secure, private and protected Rights of Way**
- **Independently owned and operated metro & long haul fiber provider**
- **Backbone is comprised of new fiber along a unique route**

**SOUTH REACH NETWORKS**  
6303 Blue Lagoon Drive,

## Who We Are

370+ mile underground metro & long haul fiber network spanning Florida's East Coast and beyond

Global gateway for Latin America and the US

Carrier Class Lit Services (10g-400g)  
Managed Spectrum (100GHz)

Interconnection with over 200 global carriers

On-Net Direct Fiber Access to Multiple Subsea Cable Landing Points and Data Centers

Cost-effective approach to growth via by fast, easy connections to carriers, customers, end users

New and unique infrastructure for diversity and low latency solutions

**SOUTH REACH NETWORKS (SRN)** is an established, Florida-based telecommunications infrastructure provider. SRN constructs, owns and operates its **Metro & Long-Haul Fiber Optic Network**. With direct routes into SRN's **Carrier Class & Neutral Data Centers**, the robust network spans over 370 miles along the East Coast of Florida.

- Industry-proven Executive Management team with extensive years of experience in building and operating fiber networks
- Backbone is diverse and independent from local incumbents
- 100% all underground fiber network
- Private Equity backed by Turning Rock Partners, a principal investment firm, that focuses on structured debt and equity investments in lower-middle market businesses in North America

## What We Do

### Fiber Network

*Dark Fiber, Long Haul and Last Mile Connectivity*

- 100% Control
- Underground network
- Fixed Budgeted Costs
- No Carrier Interference with scalability
- Private Secure Right of Way

### Dark Fiber Services Offered:

- Long-Term and Short-Term Fiber Leases
- Fiber IRUs
- Long Haul Point to Point and Metro Ring Services (Miami, Boca Raton, Jacksonville)
- Custom Fiber Builds
- Integrated Neutral Colocation Facilities Every 60 Miles (100km) for your equipment

### Lit & Managed Wavelength Services

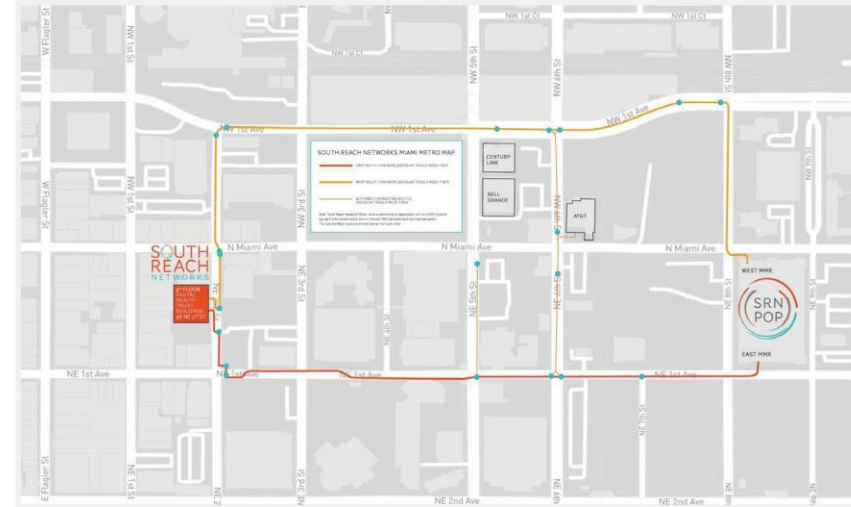

- 10G / 100G / 400G Optical Wavelength Services- Managed Spectrum 100GHz
- Metro Gig-E Solutions Over Private Waves
- IP Services

South Reach Networks' Independent Duct System and Fiber Network Infrastructure, located in downtown Miami, is a robust underground fiber network providing diverse East and West connectivity between the NAP and the SRN POP located at 36 NE Second Street 5th FL in Miami.

## FLORIDA LOCATIONS

Miami  
West Palm Beach  
Ft Pierce, Rockledge  
New Smyrna Beach  
St. Augustine

## Metro Fiber Networks

### Miami Metro Network (Data Center & POP Access)

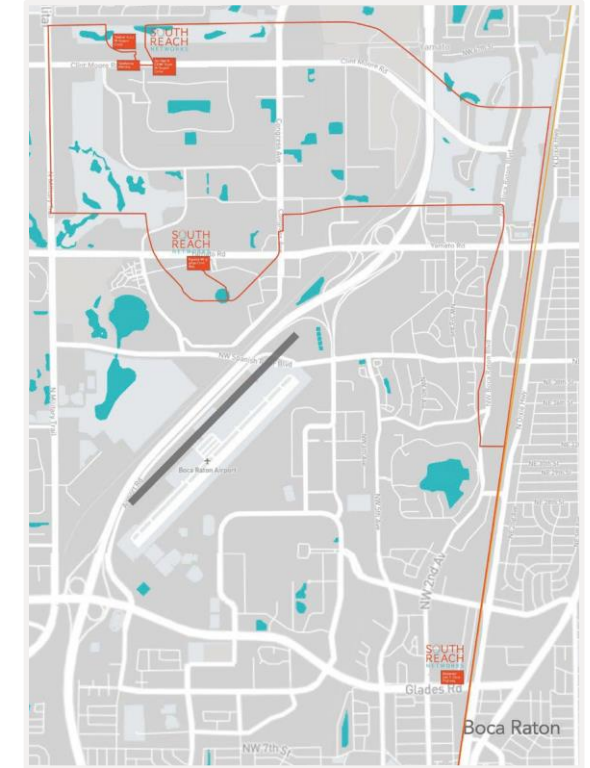

#### On Net Data Centers & Key POPS:

- 15950 W. Dixie Highway, North Miami Beach (C&W / Columbus Networks)
- 100 NE 80<sup>th</sup> Terrace, Miami FL (iM Critical)
- 36 N.E 2nd Street (5th FL MMR)
- 50 N.E 9th Street (Equinix MI 1 - NOTA)

#### Data Center with Metro Network Access

*Improve Network Control and Performance with SRN's Neutral Colocation & EDGE PoP Facilities*

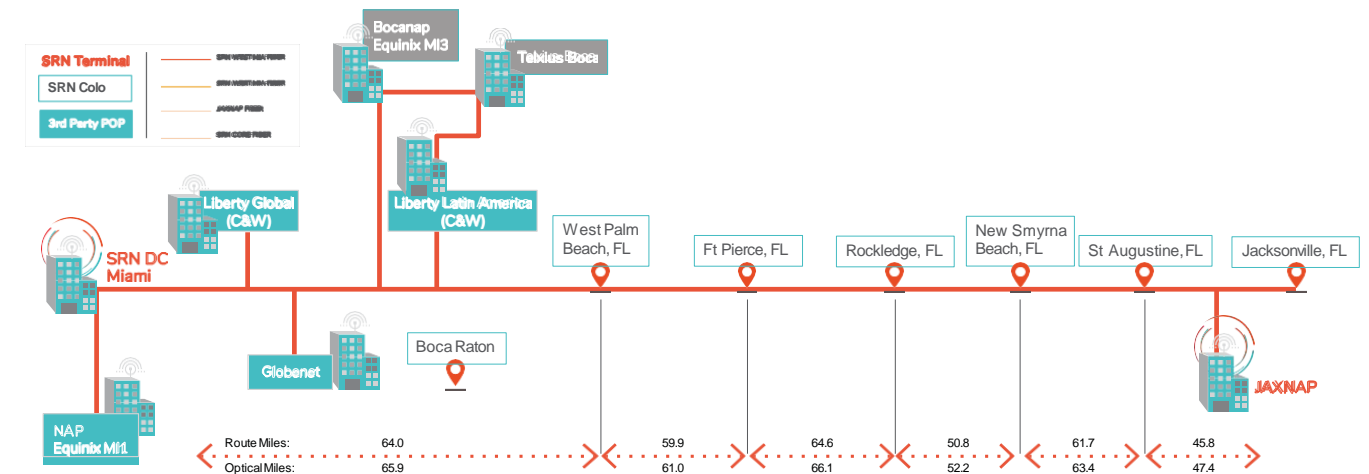

- Network-Neutral facilities located approximately every 60 miles / 100-kilometer intervals
- Accommodates long-haul signal regeneration equipment; short-haul customer and local customer colocation customer interconnection
- No Monthly Recurring Cross Connect Fees

### Boca Raton/Ft Lauderdale/Hollywood (Data Center & POP Access)

#### On Net Data Centers & Subsea Cable Landing Stations:

- 6503 W. Rogers Circle (Telxius/Telefonica/AmericaMovil)
- 4680 Conference Way (Equinix MI 3)
- 500 S. Dixie Highway (GLOBENT)
- 6520 W Rogers Cir, Boca Raton, FL 33487 (CW NETWORKS)
- 3500 NW Boca Raton Blvd., Boca Raton FL (365 Data Centers)
- 5301 NW 33<sup>rd</sup> Ave, Ft Lauderdale FL (Flexential)
- 2025 Taft Street, Hollywood FL (Ciron CLS)

## Colocation –MicroEdge- Data Centers

- ✓ Florida locations: **West Palm Beach, Ft Pierce, Rockledge, New Smyrna Beach, St. Augustine**
- ✓ Network-Neutral facilities located approximately every 60 miles / 100-kilometer intervals
- ✓ Allows the open interconnection between network operators
- ✓ Accommodates long-haul signal regeneration **equipment**; short-haul customer and local customer interconnection
- ✓ The Colocation facilities enables customers to improve network control and performance
- ✓ No Monthly Recurring Cross Connect Fees
- ✓ Cabinet Specifications Per Colo: 55 Cabinets, 23" x 84"
- ✓ Power / Cooling / Monitoring: 150kW Protected AC 120v & DC -48v Power, Backup Generator, HVAC, 24x7 NOC Monitoring

### Technical Specifications

- ✓ Total Interior Space: 1,100 sq. ft..
- ✓ Usable Customer Space: 850 sq. ft.
- ✓ Cabinet (42RU) Capacity: 55
- ✓ Total Exterior Space: 1,147 sq. ft. 25T
- ✓ Cooling Capacity: 3 phase-480 VAC- @ 600A AC
- ✓ Power Capacity: AC or DC capable (AC Smart Inversion provides UPS) Capable of (30), 2 on each phase
- ✓ Power Delivery: phase
- ✓ Inverters: 1 x Generac SD100 (100KW 3 phase); Designed for 2 x Generators 1 x 1600AH string –
- ✓ Generator: 8Hrs @ 200A DC; Allocated space for 5strings Type 2 Datacenter
- ✓ Battery Capacity: Additional Building required Shared Power Room
- ✓ Data Center Type:
- ✓ Building Modular Growth:

## SOUTHEAST US NETWORK

Wavelengths • Spectrum • Dark Fiber

### MarketREACH™

**Wavelengths:** Layer1, (10GigE & 100GigE)  
Optical Transport delivered over a secure fiber network.

**Spectrum:** 100Ghz channel. Lower cost, high capacity bandwidth, rapid delivery, customer managed transponders.

**Dark Fiber:** 100% underground. Newest fiber on the East Coast of FL - Corning SMF-28e+.

### MicroEDGE™ FL Data Centers

Purpose-built, protected power, secure, NOC monitored, located at approximately 60-mile-100km intervals.

### CityREACH™

Fiber interconnects available to MDU, HOA and other high-density metro developments along the SRN FL route.
